Customer :

SAMPLE INFORMATION

Type : Lacquer

Trade name : Synteko Natural

Supplier :

Usage :

Properties :

Reason for analysis : Information

Other remarks :

Analysis was requested for volatile components.

The analyses have been carried out by gas chromatography (GC-FID).

(A-C) Results :

No volatile components can be identified.

Some small amounts of very high boiling components can be seen, but not identified. They probably originate from the binder structure.

If requested GC-MS can be used for further identification.
